

CONNECTED TRAINING

The JMSC is capable of linking live training and simulations around the world, connecting joint and combined exercises to create more dynamic and realistic training experiences.

Simulations allow NATO and partner nations to effectively train across space and time and leverage the resources of an entire continent to help forces in Europe maintain their fighting edge.

MISSION COMMAND PROGRAM

We train U.S. and NATO units on the ART of mission command and the SCIENCE of control, preparing them for Unified Land Operations.

Our training and mentorship is designed to create agile and adaptive command and staff teams.

READY THRU TRAINING

JOINT MULTINATIONAL SIMULATION CENTER

GRAFENWÖHR, GERMANY

OUR MISSION

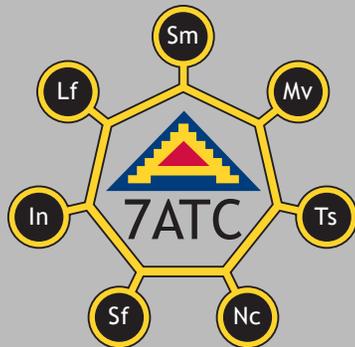

The Joint Multinational Simulation Center provides and facilitates mission command training at all echelons through live, virtual, constructive and gaming environments.

Headquartered in Grafenwöhr, Germany with spoke sites in west Germany and northern Italy, the JMSC provides efficient simulations that supplement live training and expand the battlespace for U.S., Allied and partner-nation units.

A UNIFIED TEAM

The JMSC is an integral piece of the 7th Army Training Command's unified training structure.

The 7ATC provides customized training solutions designed to meet any U.S. or Allied unit's needs, from the individual Soldier to 3-star command.

SIMULATIONS: THE ART OF THE POSSIBLE

Army training must be immersive, efficient and effective to meet the challenges of today's operating environments. We use custom blends of live, virtual, constructive and gaming technology to create training scenarios tailored to U.S., Allied and partner-nation units in Europe. Most of our training can be accomplished without expending a single bullet or drop of fuel, allowing multiple iterations that build to mission success.

At the JMSC, our training is only limited by your imagination.

Digital University
Classroom and hands-on instruction - at the JMSC or homestation - on a wide variety of Army mission command systems, such as Blue Force Tracker and Command Post of the Future (CPOF).

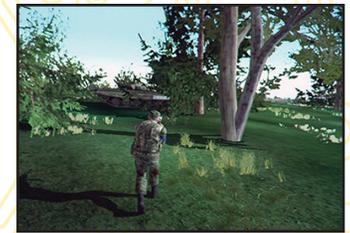

Media Simulations
Our Global News Network (GNN) team provides simulated newscasts, press conferences and interviews that add real-world complexity to our exercises.

Intel & Security
Human intelligence training using interrogation, interview and de-briefing modules. Capable of hosting TOP SECRET-level exercises and NATO intel sharing at the Multi-National Intelligence Readiness Operation Center (MN-IROC).

Command Post Exercises
Multi-echelon and multi-national exercises, from company to 3-star command level. Can provide command and control functions for simulated or live exercises in Germany or throughout the U.S. European Command area of responsibility.

3D Terrain Modeling
Custom digital models of geo-specific terrain and buildings for exercises. Combined with constructive and gaming systems to enhance simulation realism.

Tactical Gaming
Video game technology allows Soldiers to conduct mission rehearsals and virtual familiarization using geo-specific 3D models of training ranges or actual operational areas.

Scenario/Opposing Forces
Providing complex operational environments that replicate realistic political, cultural and military elements, including free-thinking and challenging opposing forces.
