

DOD GREEN PROCUREMENT METRICS

The OSD, DoD Components, and individual procuring organizations will guide and measure progress toward the DoD goal of 100 percent Compliance with Federal green procurement mandates with the following tools and criteria:

1. Contract Data. The Codes in the Contract Action Report (CAR) (or successor data capture report), using data from the Federal Procurement Data System.

The CAR includes the following data fields:

Use of Recovered Materials:

- *FAR 52.223-4 Included*
- *FAR 52.223-4 and FAR 52.223-9 Included*
- *No Clauses Included*

Use of EPA-Designated Products:

- *Meets requirements*
- *Does not meet – Justification: Performance*
- *Does not meet – Justification: Price*
- *Does not meet – Justification: Time*
- *Not required*

METRIC: Percent reduction in the number of “Not Required” codes and percent increase in the number of “Meets Requirements” codes.

2. Purchasing Data. Purchases of Federally-defined indicator items as determined using data from Defense Logistics Agency’s GPR/ERLS at Defense Logistics Information Service (DLIS).

These include items identified with an environmental attribute code, such as EPA-designated recycled-content products listed in the Comprehensive Procurement Guidelines (CPG), designated biobased items, energy efficient products, low volatile organic compound alternatives, low standby power electronics, water conserving products, asbestos alternatives, and mercury alternatives

METRIC: Increase in the purchases of Federally-defined indicator items.

3. Training Information. Personnel trained in green procurement using data from the Defense Acquisition University’s training information database.

METRIC: Increase in the percentage of personnel trained in green procurement.

4. FEC Participation. Organizations participating in the Federal Electronics Challenge.

METRIC: Increase in organizations or installations participating in the FEC.

5. Auditing Data. Number of negative contract audit findings that indicate lack of compliance with GPP requirements.

METRIC: Decrease in contract audit findings indicating lack of compliance with GPP requirements.

REFERENCES AND REPORTING INFORMATION:

- Federal Procurement Data System-Next Generation (FPDS-NG) data <https://www.fpds.gov/>
- Defense Logistics Agency's web-based Green Procurement Reporting (GPR) www.dlis.dla.mil/erlsgpr
- GPP training data from DAU (click on CLC tab then CLC046): [DAU Continuous Learning Module CLC046 - Green Purchasing](#)
- List of partners in the Federal Electronics Challenge (FEC) found at <https://db2.erg.com/fec/curpart.asp>
- Contract management reviews, environmental compliance audits, GCPC audits. Develop other measurement tools as necessary to meet local mission and management goals.

Facilities must annually report up the chain of command as necessary to meet the Federal, DoD, and Component reporting requirements.

- DoD will collect data annually to comply with the statutory and E.O. reporting requirements. Reporting guidance will be issued annually by Office Under the Secretary of Defense, OUSD (AT&L)/I&E and DPAP.
- All DoD organizations' respective evaluation and reporting processes shall be conducted in a manner that supports the content and timing of DoD's reporting requirements.
- Currently, DoD's Federal agency-level reporting requirements are limited to the E.O. 13423 Sustainable Practices, Farm Security and Rural Investment Act of 2002 (FSRIA) 9002 Annual Report, and the Annual Report to Congress for the GPP.
