

JMTC

7th Army Joint Multinational Training Command

JMTC provides dynamic training; preparing forces to execute Unified Land Operations and contingencies in support of the COCOMs, NATO, and other national requirements.

Strategically headquartered in central Europe, the JMTC is ideally positioned to develop partnerships and reinforce alliances with NATO and coalition forces.

TRAINING TOGETHER

- JMTC's world-class gunnery ranges, cutting-edge simulations center, and realistic maneuver area give the commander the power to train his Soldiers as they will operate.
- As the U.S. Army's only unified training command, JMTC has the unique ability to train from the individual Soldier to the Joint Task Force headquarters.
- JMTC deploys training support packages where they are needed. Range targetry, Observer/Controllers, Opposing Forces, and simulations capabilities provide a superior training experience anywhere.
- Multinational exercises at JMTC are building relationships and trust for future coalitions.

Mission Rehearsal Exercises

JMTC plays a critical role supporting ongoing mission rehearsal exercises throughout the EUCOM and CENTCOM areas of responsibility. These rehearsals faithfully replicate the current operating environment, fully supporting our nation's commitment to NATO. Mission Rehearsal Exercises continue to prepare Germany and CONUS-based forces and joint headquarters for deployment to current ongoing and future contingency operations.

Integrated

Fully integrating Joint, Interagency, Special Operations, allies and multinational partners, JMTC is USAREUR's focal point for full-spectrum training. Training the Warfighter for the realities of today's battlefield and joint and multinational operating environments.

World-Class Gunnery

The Grafenwoehr Training Area is comprised of 233 square kilometers of ranges and training areas that provide the U.S. Army, Air Force, and the militaries of our partner nations, with a world-class capability to conduct individual and crew live-fire qualification and company training exercises. The training area, with 44 modern, computerized live-fire ranges, can support current and future expeditionary forces composed of Stryker, airborne, infantry, aviation, and armored formations.

Maneuver Area

The 163 square kilometer Hohenfels Training Area is home to the Joint Multinational Readiness Center. The JMRC challenges leaders to think and operate as warriors and humanitarians in replicated operating environments like Afghanistan and Kosovo. With battlefield tracking and analysis systems, professional observer/controllers, civilian role-players and a world-class opposing forces, JMRC provides a live "train as we fight" experience,

Expeditionary

JMTC delivers tailored training packages to support training anywhere in the world. Available packages consist of deployable simulation, battlefield tracking and analysis systems, observer/controllers, range operations and opposing forces.

JMTC can provide CTC-like training anywhere. Military units can easily deploy to Southwest Asia, Poland, Hungary, Romania, Bulgaria, the Czech Republic or North Africa to conduct multinational training or mission rehearsals with full JMTC training capability and support.

The multi-cultural environment fosters a degree of professional exchange and personal trust essential for successful coalitions
